

DD/S&T-1912-63

30 OCT 1963

MEMORANDUM FOR: Assistant Director/Scientific Intelligence
SUBJECT: USIB-M-294, 23 October 1963, Item 6

I notice in the draft USIB Minutes of 23 October on Page 3 that the Chairman wanted the AEC to contact General Betts and the DIA Member to talk to Harold Brown to determine the feasibility of underground tests and examine the real hardness of actual missile silos. They were directed, according to the Minutes, to work with the Office of Scientific Intelligence on this matter and I will assume that you are picking up this action.
